## When The Repair Tech Comes to My House

Hi, my name is \_\_\_\_\_.

Today, a repair technician is coming to my home.

They are here to help fix something like the air conditioner, heater, or an appliance. The technician may bring tools and equipment.

Sometimes the tools can make noise like buzzing, clicking, or humming.

The technician might go into different areas like the attic, garage, or outside.

Sometimes the power may turn off for a short time. That is okay.

I can stay calm and ask a trusted adult if I have questions.

The technician is here to help make my home safe and comfortable.

### 1- Read the text. Are the sentence true (T) or false (F)?

The technician is coming to help fix something.

T  F

The technician may bring tools.

T  F

The visit will always be completely quiet.

T  F

The technician might go into different parts of the home.

T  F

The technician is there to help keep the home safe.

T  F

### 2- Read the text again and answer the questions.

Why is the technician coming to the house?

What are some things the technician might bring?

What sounds might happen during the visit?

Where might the technician need to go?

What can I do if I feel unsure?
